WAGNER OEX	Premium Application 100% Low Copper Ceramic	100%	Post Cured	Powder Coated Gray	Constraint Multi-Layer OE Shim Material for Noise, Harness and Vibration Control	100%	Included Where OE

* Some kit pricing exclusions may apply

Premium Brake Rotors

PerfectStop Rotors Have A Durable Armor-Plate™ Coating

This protection is desirable due to open wheel design. Gray Armor-Plate™ coating is applied to the hat, outside edge of the rotor and sprayed into the gap between the plates covering the cooling vanes.

Our technology produces a better performing rotor than standard replacement rotors.

Strictly complying with TS16949, QS9000 and ISO9001, the plant maintains a high level of quality control throughout the production process.

ARMOR- PLATED™ DRUMS ARE ALSO AVAILABLE

PERFECT STOP	✓
MATERIAL MEETS NORTH AMERICAN QUALITY STANDARDS	✓
NO MACHINING NECESSARY	✓
100% BALANCED	✓
