

MacPherson

M A C P H E R S O N R I D E

Complete Wheel Hub Assemblies

WE BRING IT ALL TOGETHER

With industry leading coverage and engineered product enhancements, MacPherson Hub Assemblies meet the demands of professional installers.

LESS RISK

MacPherson Hub Assemblies feature engineered improvements designed to maximize performance, reduce noise and maximize service life.

BETTER VALUE

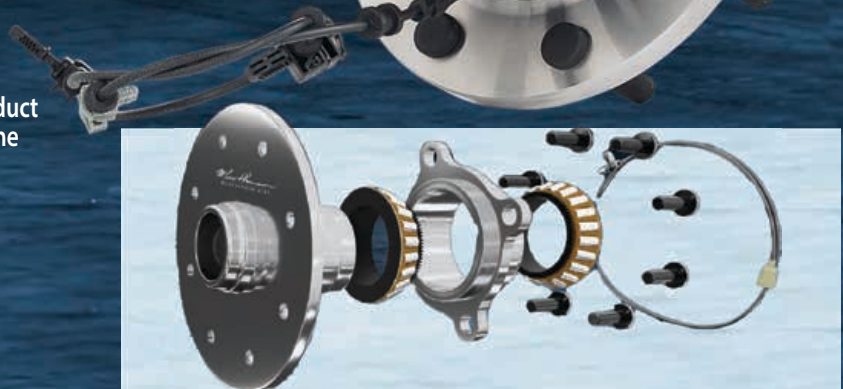

Direct OE replacement parts engineered, manufactured, and tested to meet or exceed factory specifications for performance and durability.

LESS LABOR

MacPherson Hub Assemblies are installation ready right out of the box with everything included to get the job done, and restore safe vehicle operation.

BETTER RIDE

OE Quality materials and processes combine to eliminate noise associated with bearing vibration providing a smooth, quiet ride.

PRE-LUBRICATED BEARINGS

High-Temperature grease protects internal components and provides noise-free, smooth operation.

UPGRADED ABS SENSORS

Improved harness quality increases strength and resistance to thermal fatigue.

High-Carbon Steel

Enhanced steel alloys are engineered to improve load bearing capabilities and durability.

PREMIUM BEARINGS

Precision matched bearings reduce run out and bearing noise while improving durability and ride quality.

NEW MOUNTING HARDWARE

Premium grade wheel studs and hardware are coated for improved corrosion resistance.

PRECISION RACEWAYS

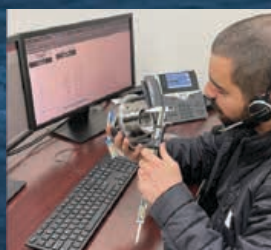

Induction hardened, micro-finished races improve bearing, durability and load capacity.

PERFECT CONNECTION

Application-specific ABS sensors match OE fit waveforms for easy integration with vehicle control systems.

INTEGRATED ABS TONE RINGS

Where required, MacPherson hub assemblies come with application specific tone rings pre-installed.
